## ULTIMATE RANGE

Hillbrush's Ultimate Range is crafted for superior filament retention and antimicrobial performance, ensuring efficient cleaning and inhibiting mould and bacteria growth.

# Colour Coding

Colour coded cleaning tools in the food industry promotes departmental segregation and minimises the chances of cross-contamination.

## The 5S System

Simple steps for a safer, cleaner, and organised workplace, aligning with HACCP for better efficiency and profit:

1. **Sort** – establish which tools are needed in which area
2. **Set in place** – organise into designated colour-coded zones
3. **Shine** – carry out regular cleaning and maintenance
4. **Standardise** – set out cleaning and maintenance procedures
5. **Sustain** – ensure standards are followed

## HACCP

Hazard Analysis and Critical Control Points (HACCP) is a proactive food safety approach for all stages of food production. It involves seven principles:

- Analyse hazards
- Identify Critical Control Points
- Set critical limits
- Implement monitoring
- Plan corrective actions
- Verify plan effectiveness
- Keep detailed records

## INJECTION MOULDING

### 🇬🇧 UK manufacturing advantages

- ✓ Re-shoring production gives you reassurance over cost & quality control
- ✓ Design to concept capabilities from our UK based HQ
- ✓ Dedicated technical support team
- ✓ Experienced manufacturing operation

We help companies Design for Manufacture (DFM) - the process of designing parts, components or products for ease of manufacturing with an end goal of making a better product.

Hillbrush have 10 injection moulding machine sizes including 90, 180, 200, 380 and 1,000 tonne locking force. We can accommodate moulded products from just a few grams up to 4.4 KG.

Rising demand in the construction industry necessitated a UK manufacturing partner for SureCav's Lightweight, rain-blocking alternative to backing blocks. Enter Hillbrush, with their injection moulding capabilities and 24/7 operations

A high-angle, wide shot of a large industrial manufacturing facility. The space is filled with complex machinery, including conveyor belts, metal frames, and various processing units. The floor is a light-colored concrete, and the ceiling is high with visible structural beams and lighting fixtures. In the foreground, there's a large blue and white machine, possibly a CNC mill or lathe. The background shows more industrial equipment and a mezzanine level with railings. The overall atmosphere is one of a busy, modern manufacturing environment.

If you're designing a brand-new product or you find yourself faced with a 'tricky problem' in production, we can work with you. We can also just discuss an idea you might have to check its viability.

# Equipment Care

## CLEANING YOUR EQUIPMENT

Remove visible dirt & foreign objects with a stiff brush

Use a cleaning solution with a pH5 or less. Rinse thoroughly with clean water & clean with an approved disinfectant

Remove disinfectant residue by rinsing with clean water or using an industrial dishwasher (82°C/175°F)

Hillbrush hygiene products can be sterilised by autoclaving at temperatures up to 134°C/275°F)

Use a wall hanging system to hygienically air-dry tools

Ensure tools have sufficiently cooled before using again

## STORING YOUR EQUIPMENT

- Store cleaning equipment away from working surfaces
- Install shadow boards in partitioned work areas
- Use a colour-coded hanging system to organise tools & avoid cross-contamination

## REPLACE YOUR EQUIPMENT WHEN...

- Filaments are entangled, creating bacterial growth hotspots
- Filaments are worn excessively or discoloured
- Plastic moulds are scratched badly or marked
